# 150 Ft Cool White LED Rope Light Kit - 120V Standard IP65 Waterproof

## DESCRIPTION

AQLIGHTING brings you the best LED rope light on the market, this 2 wire LED cool white kit generates unbelievable lighting with minimal energy draw. Consuming only 0.8w per foot, this 120V LED rope light creates 80 lumens per foot, outshining the competition. UL listed for both indoor and outdoor applications, we've included UV protection on our spool, keeping ours as new as the day you bought it while rival products yellow in the sun. Fully dimmable and simple plug-in installation, the LED cool white spool is flexible enough for any lighting project but simple enough to be used by anybody. This LED rope light is field cuttable, allowing you to trim your spool down to your individual specifications in a matter of minutes. The cool white light output is quickly making it a fan-favorite for lighting display cases, accenting important landscape landmarks, creating indirect lighting with crown molding or lining walkways. A staple in the professional construction and design fields, you can find our cool white rope light being used in high-end casinos, high class hotel chains and theatrical cinemas across the United States.
